**PARENTS, "TAKE A PEEK, ONCE A WEEK" TO CHECK FOR HEAD LICE.**

Please be observant and watch your child's behavior. Frequent head scratching may be the first sign of head lice. We recommend weekly inspection of your child's head. Look for: Live Lice (especially at the back of the neck and behind the ears); Eggs or Nits (female lice attach nits 1/2 to 1 inch away from the scalp); Lice Feces (it looks like black dust and may be found on the scalp or on pillows or shirt collars). Insecticidal shampoos/rinses are a treatment option. Combing with a lice comb is the only way to remove nits from the hair. If you do find live lice, please treat your student before they return to school. Once a child has been deloused, steps will be needed to prevent re-infestation. Examine all members in the household regularly. Wash bed linens and recently worn clothes in hot, soapy water in a washing machine. Drying in a 140 degree dryer will kill both lice and nits. Instruct children not to share combs, brushes, hats or other articles of clothing that might be contaminated. If you have any questions or need any assistance please contact the school nurse.
